NPIC/TSSG/RED-1840-69
30 September 1969

MEMORANDUM FOR: Chief, Research & Engineering Division, TSSG
SUBJECT : Contractor Support for the IEG In-House Precise Measurement Study

1. On 29 September 1969 I met with Messrs. [] of IEG/PHD in regard to the IEG In-House Precise Measurement Study.

2. IEG/PHD feels that they will need contractor support in carrying out the Stereo Mensuration Tests for this study. They have requested that RED provide a contractor (such as []) to schedule the tests, administer the tests and subjects, and to put the data in a form acceptable to the [] for reduction and evaluation.

3. The [] has setup the tests to be run and will do the data reduction on the test material. The function of the new contract will be to carry out the tests and format the data.

4. [] will visit IEG/PHD during the week of 13 October 1969 to deliver the final format for the stereo mensuration test. If RED is going to provide contractor support for this task, this might be a good time to have [] come in and meet with [] to come to a common understanding of responsibilities.

5. The scope of this contract will be small. The contractor will have one man spend about a week selecting material and putting it in a test package, two or three people for six weeks administering the tests, and have some people punch out the data on cards and possibly put it on magnetic tape.

6. I recommend we request [] to check on the availability of [] for the project, pass on [] Preliminary Test Plan DK 416 to [] for review, and invite [] to meet with [] and NPIC representatives during the week of 13 October 1969.

[]
